Drive Hub
Drive Card: 4ch 3A CV

SPECIFICATION SHEET

This drive card provides four separately controlled outputs with a regulated current of up to 3A for use with constant voltage (CV) fixtures, such as RGBW LED tapes.

The output voltage is determined by the supply from the Card Frame backplane, nominally 48VDC (the possible range is 24 to 72VDC).

Up to twelve drive cards, of the same or different types, can be fitted within a single Drive Hub Card Frame chassis or up to six drive cards within a Mini Pack chassis.

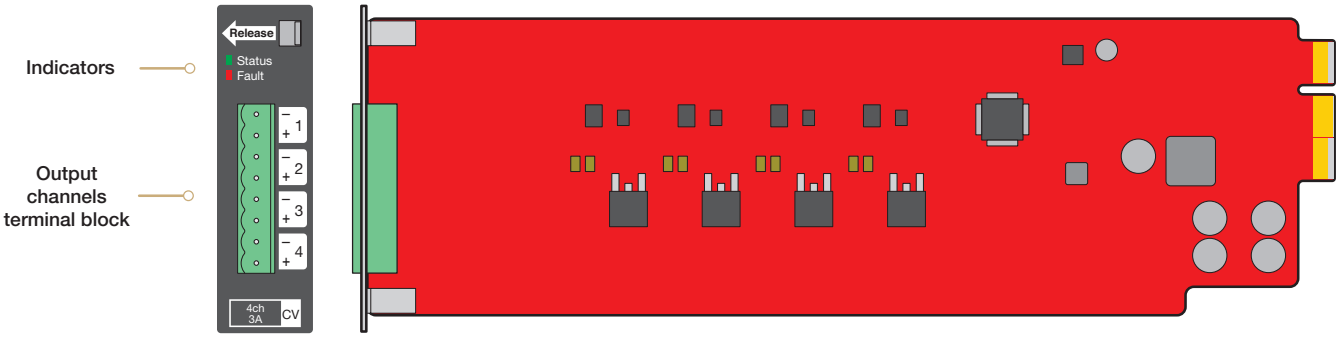

CV, 4 x 3A drive card

Key features

- Designed to supply constant voltage fixtures up to 3A (144W) in total.
- Short-Circuit and Over-Current Protection: The drive card is protected from cable faults and overload by automatically disabling the output should a fault or overload condition occur. It will auto recover once the fault has been removed.
- Hot-pluggable within the Card Frame chassis.
- Status and fault indications on the rear panel.

Layout Overview

Indicators

Status	Flashing:	Normal operation
	On or Off (static):	Card failed
Fault	Off (static):	No fault detected
	Flashing:	Load current 90% to 100% of full capacity
	On (static):	Channel disabled due to over-current

Indicators

Input voltage:	24-72VDC (48V Nominal)
Input current:	12A maximum
Protection fuse:	20A (not user replaceable)
Channel output current:	3A (warning at 90%)
Output connector(s):	Phoenix Contact® MSTB 2,5/8-ST (1 off)
Short circuit protection:	Yes
Open circuit disable:	Yes
Total capacity,	
per Card Frame chassis:	100A
per Mini Pack chassis:	75A

Summary

Card type:	Constant voltage
Part number:	DHDC4CHCV3
Channels:	4
Load:	3A maximum

Drive card options

Card type	Order code
2ch 2,200mA CC	DHDC2CHCC2.2
4ch 1,500mA CC	DHDC4CHCC1.5
4ch 3,500mA CC	DHDC4CHCC3.5
8ch 700mA CC	DHDC8CHCC0.7
1ch 10A CV	DHDC1CHCV10
4ch 3A CV	DHDC4CHCV3
IPM 10A	DHDCIPM
IPM2 10A	DHDCIPM2
